VERSION 5 — TOP 30 v4: #1 RALLY PEPTIDE (FOUNDER'S PICK) · #2 SPANCELL

## Top 30 — Ranking v4 (Rally-First)

Updated: August 16, 2026 · 6,708 names checked · 2,065 leads · six adversarial screens

This ranking incorporates the founder's directive: **Rally Peptide leads**. The deep scan graded it **C– (CROWDED)** — the only survivor of the Rally/Rewind/Shred trio — and the caveats are printed with it, not hidden. Spancell remains the analyst's pick at #2. Names marked ⚠️ carry a known near-collision; names marked ◇ have not been through the adversarial agent screen.

### Tier 1 — The picks

| # | NAME                      | DOMAIN            | RATIONALE & CAVEATS                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|---|---------------------------|-------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | <b>Rally Peptide</b><br>🚩 | rallypeptide.com  | <b>Founder's pick — validated as viable.</b> No peptide company uses "Rally"; Rally Health (UnitedHealth) is sunsetting Apr 2026 — favorable timing. Energetic, positive, memorable. <b>Required before building:</b> TESS clearance on RALLY in Cl. 5/44 (Rally® hangover + AEP Rally & Recover® exist), WHOIS on rallypeptides.com (plural is registered/parked — try to acquire), and watch "Pep Rally" in the peptide channel. Companion handle rallypep.com is open — grab both. |
| 2 | <b>Spancell</b>           | spancell.com      | Analyst's pick — the only unqualified KEEP of the venture screen: "lifespan + cell," clearable, platform-scale.                                                                                                                                                                                                                                                                                                                                                                       |
| 3 | <b>Encore Cell</b>        | encorecell.com    | Best narrative ("your second act"); conditional on an Encore-crowd knockout.                                                                                                                                                                                                                                                                                                                                                                                                          |
| 4 | <b>Houndcell</b>          | houndcell.com     | Dog-line winner; clean screen.                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 5 | <b>Reeflongevity</b>      | reeflongevity.com | Clean, longevity-literal.                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 6 | <b>Pupcell</b>            | pupcell.com       | USPTO-clear; most memorable dog name.                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

## Combo reality check (asked & answered)

**WellStack, ProDose, DoseStack, PepStack, PepDose, PureDose, BioPeptide — all TAKEN.** The deeper stack/protocol/dose dig surfaced only the Tier-4 names above plus keendose, peakedstack, booststack, raldose. The stack/dose vein is confirmed strip-mined.

*All "available" = DNS-open lead; registrar-verify before buying, USPTO knockout before building. ◇ names have not been agent-screened — say the word to run the brutal screen on any of them.*

# RUO-Style Scientific & Medical Names

**Also open in this style:** capitalpeptide, bastionpeptide, elevatedbiotech, paramountbioscience (⚠️ Paramount Peptides + Paramount Global — high risk), peptidesformulations, peptidesstandards, peptideskinetics, peptidessynthetics, peptidesconsortium, apexbiopeptides.

RUO reality check: this naming style deliberately mimics the research-vendor shelf — that's the look you asked for, and these fit it. But remember the landscape finding: this style is increasingly FDA-enforcement-coded (Peptide Sciences shut down, Amino Asylum raided). Best used for a B2B/science face, not the consumer platform brand.

# The a16z Verdict — What Brand & Domain Would I Actually Invest In?

**Framed as:** a Managing Director evaluating a peptide/longevity company at seed/Series A.

## The uncomfortable truth this scan surfaced

---

I ran three fresh scans through the investor lens — iconic single words, elegant coinages, and `[word]stack.com`. The result was decisive:

- **Iconic single-word .com s: 181 of 186 taken.** Aevum, Vivos, Elysia, Renova, Lumina, Vitera, Fount, Vireo — all gone.
- **Elegant coinages: 83 of 92 taken.** The only "available" ones were typo artifacts.
- **[word]Stack.com : every strong one taken** — including your own examples **LifeStack, BioStack, AlphaStack**, plus Vital/Prime/Peak/Health/Gene/Power/Iron/Cell/Nova/Core/Pure-Stack.

**Conclusion:** at hand-register prices, an *iconic* brand `.com` does not exist. This is the single most important finding of the whole project.

## How I actually evaluate a brand as an investor

---

The brands that won this category prove one pattern: **none put the molecule in the name.** - **Function Health** (labs) — benefit, not mechanism; ~\$2.5B. - **Superpower** (labs) — aspirational platform. - **Levels** (glucose) — one clean word. - **Oura** (ring), **Ro, Hims** — short/coined, expanded far beyond the first product.

An investable brand is: (1) **not category-locked** (peptides are the *wedge*, not the identity), (2) **memorable in one hearing**, (3) **credible not grey-market**, (4) **an exact-match one-word .com**, (5) **timeless in a logo**.

By that bar, **no [word]peptide.com should ever be the company brand** — Alder included. It was topping my list only because I was optimizing trademark-whitespace, not brand equity. That was the wrong lens. Corrected.

## What I would invest in

---

**My recommendation is a strategy, not a leftover domain:**

### 1. The name must NOT contain "peptide."

Peptides are the launch product; the brand should be a **longevity / human-optimization platform** so it survives the science evolving (GLP-1s, gene therapy, whatever's next). Name for the *outcome*.

### 2. Treat the domain as an acquisition, not a registration.

The \$15k ceiling buys a *decent* aftermarket name but not an elite one-word `.com` (those run **\$30k–\$500k**). For a venture-backed brand this is the cheapest equity you'll ever buy — **budget \$50–150k and acquire the exact-match .com**. Prime acquisition targets (all taken, all brokerable): **fount.com, vireo.com, aevum.com, elysian.com, fountain.com, renew.com, thrive.com**.

### 3. If self-funding under \$15k, the one available name I'd actually build on:

#### **Spancell — spancell.com (available lead)**

"**Lifespan + cell.**" The only name across ~90 individually screened finalists to survive the venture-grade adversarial screen as an **unqualified KEEP**: it means something, it's two crisp syllables, science-coded, platform-scale, and the trademark is likely clearable in Class 5 (nearest collision is a Japanese industrial foaming agent in an unrelated class). Grab `spancell.ai` as the tech-halo backup.

**Retraction:** an earlier version of this verdict crowned **Vitanova**. The deep screen killed it — a live USPTO registration in the exact supplements class, an operating NMN-longevity brand at `getvitanova.com`, an Rx product in India, a fertility chain, and a public shell all share the name. It was the most-collided name on the list, and the re-screen is what caught it.

**Runners-up (available leads), ranked by investability:** 1. **Encore Cell** (`encorecell.com`) — the best narrative ("second act of life"); conditional on a Cl. 5/10/44 knockout. 2. **Peptovance** (`peptovance.com`) — best coined; only knock is the "pep" tell. 3. **Reeflongevity** (`reeflongevity.com`) — clean and literal, but longer.

#### **The honest MD bottom line**

If this were my investment, I would **not** let the founder ship a `[word]peptide.com`. I'd fund a **domain-acquisition line item** and buy a one-word `.com`, because in DTC health the brand is the moat and underspending on it is the classic seed-stage mistake. If capital is truly constrained, **Spancell** is the one name here I'd greenlight without wincing — and the Vitanova retraction above is exactly why every finalist gets a deep screen before money moves.

# Deep Scan — Rally Peptide · Rewind Peptide · Shred Peptide

| Shred Peptide  | Yes — 4+ "Shred" research-peptide SKUs         | SHREDZ family (incl. SHREDZ ANTI AGING), JAVA SHRED | FATAL / CROWDED | D-    |

## 1. Rally Peptide — CROWDED (C-) · the only survivor

- No peptide company named "Rally Peptides" found — but rallypeptides.com (plural) is REGISTERED (has nameservers; parked/dormant — our DNS scan corrects the search-index guess). Someone holds the exact-match plural.
- Rally Health (UnitedHealth/Optum) is sunsetting — RallyHealth.com retires April 30, 2026 into OptumEngage. Favorable timing, but UnitedHealth-scale registrants keep marks alive; assume residual enforcement.
- Class 5 is occupied: Rally® hangover-recovery supplement (rallynutrition.store, ® claimed), AEP Rally & Recover® (® claimed), LTH Rally Amino Recovery (Life Time), Tiered Nutrition RALLY™, Rally Patch. Plus "Pep Rally" — a peptide protocol-tracking app and a peptide directory — near-names in the exact channel. RALLY has TTAB fight history in wellness (RedBrick Health opposition).
- Read: usable with eyes open — likely coexistable but a cluttered register, possible office-action citations, weak enforceability, and the plural .com in someone else's hands.

## 2. Rewind Peptide — FATAL (F) · confirmed and worse than the first screen

- Rewind Anti-Aging of Miami (est. 2015) — a peptide-therapy clinic aggressively SEO'd on "rewind + peptide" (BPC-157, TB-500, CJC/Ipamorelin, semaglutide, retatrutide, NAD+). Head-on collision: same word, same products, entrenched search results.
- Rewind Wellness & Aesthetics (Phoenix) — second peptide clinic on the word.
- Peptide/collagen products already named Rewind: The Rewind Peptide Cream, LTH Rewind Collagen Elixir, Purovitalis Rewind Liquid Collagen, Parallel Health Daily Rewind Duo (peptide cream), Rewind Urolithin A longevity softgels. Skincare near-names: Stratia Rewind peptide serum, Neude Rewind (ELLE award), skinbetter BioRewind supplement, Curology BE KIND REWIND, MONAT REWIND.
- Blocking mark: REWIND — Rewind Holdings, LLC, covering dietary & nutritional supplements (Class 5).
- Read: confusion is guaranteed, USPTO refusal likely, and the SEO is unwinnable even though rewindpeptide(s).com are open. Do not proceed.

### 3. Shred Peptide — FATAL commercially / CROWDED legally (D-)

- **Research-peptide vendors already sell "Shred"-named peptide products:** Serendipity SUPER SHRED, PSPeptides Shred Express Bundle (AOD-9604/Tesamorelin/Retatrutide), Dope Peptides Super Shred, Huma Peptide SHRED AM-PM, USA Peptide Science SUPER Shredder — the phrase "shred peptides" is pre-associated with grey-market vendors.
- **shredpeptides.com (plural) is REGISTERED** (nameservers present — our DNS scan corrects the search-index guess); singular is open but buys nothing.
- **Shredz is alive:** shredz.com still sells, and Shredz Supplements LLC holds a 2014 mark family — SHREDZ, SHREDZ CREATINE/PROTEIN/TESTOSTERONE/PREWORKOUT and notably **SHREDZ ANTI AGING** — one letter from your name, with litigation history. Fat-burner SKUs named exactly "Shred" from 8+ brands (Core, Cellucor Super Shred, 5% Shred Time®, Musashi, HTLT G Shred...); SHRED fitness app owns broad mindshare; V Shred looms.
- **Read:** "shred" + "peptide" is generic-on-generic — near-zero protectable matter, an unpleasant trademark neighbor, and exactly the grey-market shelf you want to avoid.

Adjacent lookalikes occupied: rallyhealth.com, rallyrx.com, rewindlabs/rewindhealth/rewindwellness.com, shreddrx/shredlabs/shredhealth/shredsupps.com, getshredded.com. Open: rallypep.com, rewindrx.com.

### Bottom line

**Rewind and Shred are dead** — both have competitors selling peptides under the same word today, plus Class-5 trademark blockers. **Rally is the only viable one of the three (C-):** no exact peptide collision and Rally Health is exiting, but the supplement register is cluttered, "Pep Rally" sits in your exact channel, and someone already owns rallypeptides.com. If Rally tempts you: WHOIS rallypeptides.com to see who holds it, and run a formal TESS clearance on RALLY in Classes 5/44 before spending anything.

# Top 25 — v3 (SUPERSEDED BY TOP 30 v4, previous section)

Updated: August 16, 2026 · Investor lens primary · Alder demoted · Vitanova rejected

Across eight generation passes, **6,232 names checked** → **2,003 DNS-open leads**. Five rounds of hostile trademark/collision/linguistics screening (~90 finalists individually researched) produced this ranking. The lens is now **brand equity first**: platform-ability, memorability, and collision profile outrank raw trademark whitespace. That is why Alder — legally clean but semantically empty — no longer leads, and why names containing "peptide" sit in their own lower tier (wedge brands, not platform brands).

**Two corrections this version bakes in:** 1. **Vitanova is REJECTED with prejudice** — the deep screen found a live USPTO registration (Class 5, supplements), an operating NMN-longevity brand at getvitanova.com, an Rx product in India, a fertility chain, and a public shell all on the name. My earlier recommendation was wrong; the re-screen caught it. 2. **"available" = DNS-open lead**, not registry-confirmed (the malibupeptide lesson — it is TAKEN and has been removed from this list). Verify every name in a registrar box, then run a USPTO knockout (Cl. 5/44) before building.

## Tier 1 — Platform-grade survivors (stress-tested KEEPs)

| # | NAME          | DOMAIN            | WHY IT LEADS                                                                                                                                                                                                                                                  |
|---|---------------|-------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Spancell      | spancell.com      | The <b>only unqualified KEEP</b> of the venture-grade screen: "lifespan + cell" means something, two crisp syllables, science-coded, TM likely clearable in Class 5, no in-category collision. Platform-scale — works for peptides today and whatever's next. |
| 2 | Encore Cell   | encorecell.com    | Best narrative in the study — "your second act." Only survivor of the action-word batch. Conditional: "Encore" is crowded in med devices (Encore Medical/Vision), so a Cl. 5/10/44 knockout is required; no exact "Encore Cell" mark found.                   |
| 3 | Houndcell     | houndcell.com     | The dog-line winner: clean screen, no bad reading, cellular-longevity story. Natural sister brand to Spancell/Pupcell.                                                                                                                                        |
| 4 | Reeflongevity | reeflongevity.com | Clean legally (Reef = footwear only), longevity-literal, self-spelling. Longer than ideal, but a real platform name.                                                                                                                                          |
| 5 | Pupcell       | pupcell.com       | USPTO-clear, most memorable dog name; style the wordmark to defuse the faint "pup sell" reading.                                                                                                                                                              |

## Tier 2 — Brand bench (usable after coexistence/TM clearance)

| # | NAME         | DOMAIN          | THE KNOCK                                                                |
|---|--------------|-----------------|--------------------------------------------------------------------------|
| 6 | Puprenew     | puprenew.com    | Clean screen; soft "-ew" tail — style as PupRenew.                       |
| 7 | Coredose     | coredose.com    | Clearable; "dose" names the pill, not the platform.                      |
| 8 | Stride Vital | stridevital.com | Clearable if Stride Health coexistence checks out; weak category signal. |

| #  | NAME               | DOMAIN         | THE KNOCK                                                                             |
|----|--------------------|----------------|---------------------------------------------------------------------------------------|
| 9  | <b>Sculpt Cell</b> | sculptcell.com | Available and evocative, but drifts toward the litigious CoolSculpting/med-spa space. |
| 10 | <b>Distill Rx</b>  | distillrx.com  | Purity story; knocks are the distillery reading and "Rx" regulatory bait.             |
| 11 | <b>Mitoevo</b>     | mitoevo.com    | Mitochondrial story; vowel pileup hurts the radio test.                               |
| 12 | <b>Pepvim</b>      | pepvim.com     | Clean and tight, but lightweight — gummy-vitamin energy.                              |
| 13 | <b>Summitdose</b>  | summitdose.com | Clearable; "peak dose" reads psychedelics-adjacent.                                   |
| 14 | <b>Awaken Dose</b> | awakendose.com | Benefit verb; Awakn Life Sciences phonetic overlap + microdosing read.                |

### Tier 3 — Coined (ownable, carries the "pep" tell)

| #  | NAME                 | DOMAIN           | NOTE                                                                        |
|----|----------------------|------------------|-----------------------------------------------------------------------------|
| 15 | <b>Peptovance</b>    | peptovance.com   | Best coined survivor — no collision found, spells cleanly.                  |
| 16 | <b>Peptaronix</b>    | peptaronix.com   | Collision-clean, biotech feel; "-onix" leans research-chem, clear via TESS. |
| 17 | <b>Peptidyne Bio</b> | peptidynebio.com | Clean coined root; "-dyne" crowded, "bio" is filler.                        |

### Tier 4 — [word]peptide compounds (wedge brands only — category-locked by design)

| #  | NAME                     | DOMAIN               | NOTE                                                                                                                                                               |
|----|--------------------------|----------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 18 | <b>Montauk Peptide</b>   | montaukpeptide.com   | Best of the compounds: evocative, no in-lane collision.                                                                                                            |
| 19 | <b>Reef Peptide</b>      | reefpeptide.com      | Short, punchy; Reef footwear only.                                                                                                                                 |

**spancell.com** (the platform brand), **encorecell.com** (the narrative brand), **houndcell.com** (the dog brand) — a coherent "-cell" family across both lines, every one a stress-test survivor. Registrar-verify all three, then USPTO knockout before building.

# Best Names — After a Brutal Stress Test (first round — superseded)

 **SUPERSEDED:** this section is the *first-round* screen kept for history. The current ranking is **Top 25 v3** (previous section): **Spancell #1**, Alder demoted to #23.

**Updated:** August 15, 2026 · Companion to `peptide-domain-research.md`

The earlier shortlist was run through a **hostile trademark / collision / linguistics screen** — every name searched for reasons to *reject*. Most did not survive. What follows is only the names that did, each with the specific flaw that keeps it off a "perfectly clean" rating, plus availability across `.com` `.ai` `.io` `.gg` `.club`.

**Read this first — two hard truths from the screen:** 1. **[Word] Peptide is structurally weak.** The second word is generic and unprotectable, so you're really trademarking the first word alone — and the peptide space is swarming with "research use only" grey-market vendors, so *regal/imperial/royal/prime* styling reads as a research-chem storefront. 2. **None of the survivors are 100% clean.** Each is "least-fatal," not "clear." Before committing to any one, run a formal **USPTO knockout search (Class 5 supplements / Class 31 pet, Class 44 telehealth)** and a live domain + social-handle check. This document is a screen, not legal clearance.

| Peptovi          | <b>Peptivo.com</b> — an existing peptide/GLP-1 telehealth brand, one letter off (i↔o). Indistinguishable when spoken.                     |
| Peptura          | The name <b>is already a live grey-market research-peptide vendor</b> (peptura.org/.us) — "research use only, not for human consumption." |
| Imperial Peptide | <b>"Imperial Peptides"</b> already exists as a cluster of grey-market vendors (US + UK).                                                  |
| Regal Peptide    | Grey-market-coded ("Royal Peptides" is a vendor) + Regal Labs sells supplements.                                                          |
| Lantern Peptide  | <b>Lantern Pharma</b> — a <i>public</i> clinical-stage oncology biotech (NASDAQ: LTRN). Direct TM exposure.                               |
| Cobalt Peptide   | Cobalt is a <b>toxic heavy metal</b> ("cobaltism," cardiotoxic) — a poison-metal name on an ingestible + Cobalt Pharmaceuticals.          |
| Meridide         | Unspellable on hearing (MER-ih-dyde? meh-RID-ee?); the "-ide" ending sounds like a chemical, not a brand.                                 |
| Pupitide         | <b>FATAL — "Puptide" already exists</b> (takeuptide.com): a real dog peptide + NMN longevity supplement. Same niche, one letter apart.    |
| Collapup         | Reads as <b>"COLLAPSE."</b> Catastrophic for a longevity brand.                                                                           |
| Pawllagen        | Radio test fails (nobody spells the double-L) and the paw+collagen pun is already a category cliché (Pawable Collar-Gen, PawLabs).        |

## The best names — humans

All five are **available across every requested TLD**. Ranked by *least-fatal* per the screen. The "peptide" in the string is optional — see the note above; a coined/arbitrary name you can fully own is strategically stronger if you can clear one.

| RANK | NAME                   | .COM | .AI | .IO | .GG | .CLUB | THE ONE CAVEAT TO CLEAR                                                                                                                   |
|------|------------------------|------|-----|-----|-----|-------|-------------------------------------------------------------------------------------------------------------------------------------------|
| 1    | <b>Harbor Peptide</b>  | ✓    | ✓   | ✓   | ✓   | ✓     | Only hit is <b>Harbour BioMed</b> — foreign, British "Harbour" spelling, antibody drugs (not consumer). Cleanest radio + vibe of the set. |
| 2    | <b>Ridge Peptide</b>   | ✓    | ✓   | ✓   | ✓   | ✓     | No consumer-peptide collision; Ridge Bio/Pharma are B2B. Watch: <b>Ridge Wallet</b> owns DTC "Ridge" recall; a touch generic.             |
| 3    | <b>Cedar Peptide</b>   | ✓    | ✓   | ✓   | ✓   | ✓     | Premium, calm, effortlessly spellable. Watch: "Cedar" is crowded in health (Cedar Inc, Cedar Pharma) and reads generic-spa.               |
| 4    | <b>Sable Peptide</b>   | ✓    | ✓   | ✓   | ✓   | ✓     | Luxe, short, memorable. Watch: <b>Sable Therapeutics</b> is a science-beauty brand in your skincare adjacency — closest collision.        |
| 5    | <b>Kindred Peptide</b> | ✓    | ✓   | ✓   | ✓   | ✓     | Warmest/most distinctive. Watch: <b>Kindred Healthcare</b> (large) + <b>KindredBio</b> (biopharma, bought by Elanco) — clear carefully.   |

**Pick order:** if you want the safest, most ownable name → **Harbor Peptide**. If you want warmth/personality and will pay for a careful clearance → **Kindred Peptide**. If skincare is the wedge → avoid **Sable** (Sable Therapeutics) and take **Cedar**.

## The best names — dogs

The dog pool was gutted (Pupitide and Collapup were fatal). These four survived the screen clean and are **available across every TLD**. The "-cell" names carry a real advantage: "cell" reinforces a *cellular-longevity / peptide* story instead of undercutting it.

| RANK | NAME         | .COM | .AI | .IO | .GG | .CLUB | WHY IT SURVIVED                                                                                                                                                             |
|------|--------------|------|-----|-----|-----|-------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1    | Pupcell      | ✓    | ✓   | ✓   | ✓   | ✓     | <b>USPTO-clear</b> (no "Pupcell"/"Pup Cell" mark). Cleanest slate in the whole study; "cell" is on-theme. Only soft note: style the wordmark so it doesn't read "pup-sell." |
| 2    | Houndcell    | ✓    | ✓   | ✓   | ✓   | ✓     | No brand collision found; same cellular-longevity theme as Pupcell, slightly more grown-up ("hound" vs "pup").                                                              |
| 3    | Puprenew     | ✓    | ✓   | ✓   | ✓   | ✓     | No collision; "renew" squarely on-theme for longevity. Style as <b>PupRenew</b> to avoid the faint "...ew" tail.                                                            |
| 4    | Foreverhound | ✓    | ✓   | ✓   | ✓   | ✓     | No collision; clean longevity promise, easy to say/spell, premium enough for a longevity price point.                                                                       |

Dropped on re-check: **caninecell** — too close to the existing **Canine Red Cell** supplement.

**Pick order:** **Pupcell** is the standout — it's the single cleanest name in the entire study and the "-cell" story ties directly to peptides/longevity. **Houndcell** is the natural sister brand if you want a more mature tone.

### Availability method (this round)

Each name was queried for an NS / SOA record against public resolvers for **every TLD** ( `.com/.ai/.io/.gg/.club` ); an authoritative **NXDOMAIN** = **available**. Verified with a second independent resolver + record type (controls `claude.ai` , `openai.io` , `dan.gg` , `get.club` all correctly returned *taken*). Collision findings came from live web/trademark searches; see the source links in the two research passes. **Availability shifts daily — confirm at purchase, and clear the trademark before you build.**

# Themed Modifier Expansion — Places, Fitness, Health, Youth/Age

Updated: August 15, 2026 · Companion to `best-names.md`

Four new modifier families, checked for availability. **164 of 407 new candidates are open on `.com`**. Curated best-of-theme below, each verified available across `.com` `.ai` `.io` `.gg` `.club`, with collision flags where a real company owns the space.

Same caveats as the stress test apply: a `[word] Peptide` mark protects only the first word, "peptide + gym-slang" reads grey-market, and none of these are legally cleared — USPTO knockout before you build.

## 1. Wealthy places

The best of these are evocative and premium; the trap is a place-name that's also a pharma company or a product.

## 2. Athletics & fitness 💪

Clean performance words vs. bodybuilding-forum slang. **Note:** `fitpeptide.com`, `leanpeptide.com`, and `shredlab.com` are already **taken**. The gym-slang names below are available but read grey-market/"cutting cycle" — a real liability in a category the FDA is actively policing. Use with eyes open.

## 3. Health modifiers 👁️

**Note:** `visionpeptide.com` and `visionlabs.com` are **both taken** (VisionLabs is a real AI/face-recognition company). "Visionary" is the open lane. Many single health-word + peptide names are descriptive and weak (immunepeptide, memorypeptide reads like a lab label, not a brand).

| PICK                      | .COM | .AI | .IO | .GG | .CLUB | NOTE                                           |

| <b>Resilience Peptide</b> | ✓    | ✓   | ✓   | ✓   | ✓     | Recovery/stress angle; on-trend.               |
| <b>Cognition Peptide</b>  | ✓    | ✓   | ✓   | ✓   | ✓     | Nootropic/focus positioning.                   |

Also available ( `.com` ): visionarypeptide(s), healthspanpeptide ⚠️ (see below), immunepeptide, immunitypeptide, memorypeptide, mentalpeptide, cognitionpeptide, vascularpeptide, resiliencepeptide, luminouspeptide. *Descriptive/weak but open — not recommended as a primary brand.*

## 4. Youth / age / biohacking ⌚

The richest theme for a longevity brand — but also where the real longevity companies live, so collisions are the danger.

## Top of the whole expansion, if forced to pick

1. **Rewind Peptide** — clearest, most brandable idea in the entire themed set for a longevity play.
2. **Montauk Peptide** — the standout wealthy-place name: premium, cool, clean collision profile.
3. **Athletic Peptide** — the clean, broad-market fitness option (skip the gym-slang ones).
4. **Visionary Peptide** — the open "vision" lane after vision/visionlabs came back taken.
5. **Youthspan Peptide** — healthspan energy, none of the healthspan/bioage trademark risk.

All available on [.com/.ai/.io/.gg/.club](#). Confirm at a registrar and run a USPTO knockout before committing.

# Trendy Neighborhood & District Names — "Soho" Vein

**Added:** August 15, 2026 · Sparked by a real buy: [sohopeptide.com](https://sohopeptide.com)

The chic-enclave pattern (short, globally recognizable, upscale, effortless to say) is a strong vein for a premium peptide brand. **236 neighborhood candidates checked; 39 of the 40 most iconic show DNS-open.**

## ⚠ Read this about "available" (methodology correction)

This environment has **no authoritative registry access** (RDAP and WHOIS/port-43 are firewalled) — only DNS. So "available" here means "**has no nameserver delegation**", which is a strong *lead* but **not a guarantee**: a domain that's registered-but-parked-with-no-DNS (e.g. [malibupeptide.com](https://malibupeptide.com), which looked open but is actually taken) reads the same as a truly free one. The signal reliably identifies **taken** names (they have nameservers) but the "available" set is a **grab-check list** — confirm each in a registrar's search box before buying, exactly like [sohopeptide.com](https://sohopeptide.com) was. Treat every "available" name across this whole study the same way.

## Top iconic leads (verify at registrar)

# Deep Dive — Health, Clinic, Cell, Youth & Biohacking Focus Words

**Added:** August 15, 2026 · Focus-word expansion (dose · clinic · rx · health · wellness · vital · cell · cyto · mito · youth · longevity · biohacking · protocol · science terms)

879 candidates checked → **244 DNS-open leads**. Curated best per focus word below.

**Same accuracy caveat:** "available" = DNS-open lead (no nameserver delegation), **not registry-confirmed** — verify each in a registrar search box before buying (RDAP/WHOIS are firewalled here). Collision flags below are from earlier research; ⚠️ = a real company owns the modifier.

## Best per focus word

### **Dose — clean, clinical, modern (strong category)**

coredose · summitdose · meridiandose · catalystdose · forgedose · emberdose · helixdose · axisdose  
Biohacking-dose: optimizedose · upgradedose · enhancedose · activatedose · unlockdose  
⚠️ avoid: cedardose (Cedar health-fintech), lumendose (Lumen metabolism device),  
aerdose / ondadose / vireodose (Aer/ONDA/Vireo).

### **Cell / Cyto / Mito — the richest vein (85 leads); "mito" = mitochondria, very biohacking**

coremito · novamito · primemito · zencyte · northcyte · auracyte · cytopeptide · cyclepeptide · pepmito · pepcyto  
Reef family (clean, footwear-only collision): reefcyte · reefmito · reefcellular ⚠️  
avoid: lumencyte/lumenmito, kindredmito, cedarcell, vireocyte, aercyte, ondamito.

### **Biohacking — you asked for this specifically (39 leads)**

peakbiohack · corebiohack · reefbiohack · summitbiohack · northbiohack · kineticcbiohack · helixbiohack  
Action verbs + peptide: upgradepeptide · unlockpeptide · superchargepeptide · amplifypeptide · peptideupgrade  
⚠️ avoid: cedarbiohack, lumenbiohack, ondabiohack, vireobiohack; skip biobiohack (redundant), biohackingpeptide (descriptive).

### **Vital / Vitality**

cytovital · cytovitality · catalystvital · protovitality ⚠️ cedarvital/cedarvitality (Cedar),  
aervitality / ondavitality (Aer/ONDA).

### **Youth / Longevity / Span**

spanpeptide · reefspan · pepyouth · pepageless · cardinalsan · meridianspan · protoyouth ⚠️  
kindredspan (Kindred), cedaryouth (Cedar), aeryouth / ondayouth / vireoyouth.

### **Rx / Apothecary / Dispensary / Script (premium-clinical)**

apothecarypeptide · pepapothecary · scriptpeptide · dispensarypeptide ("Apothecary" reads artisanal-premium; strongest of this group.)

## Science terms (receptor · ligand · potency · assay · synthesis) — research-vendor angle, descriptive

receptorpeptide · ligandpeptide · peptidepotency · assaypeptide · synthesispeptide ·  
peptidereceptor *Note: "peptide receptor" is a literal scientific term — clear to register but weak as a brand.*

## Protocol / Stack / Regimen / Cycle (peptide-user vernacular)

cyclepeptide · regimenpeptide · superchargestack · superchargeprotocol · aerprotocol ("Cycle"  
and "stack" are exactly how peptide users talk — good for a community/vendor brand.)

## Clinic — mostly taken; slim pickings

alderclinic · pepclinical *(the clean [word]clinic.com space is largely gone.)*

## Top 10 from this batch (my picks, all leads — verify at registrar)

---

1. **coredose.com** — clean, clinical, modern; best "dose" name
2. **cyclepeptide.com** — peptide-user vernacular ("cycle"); on-domain
3. **coremito.com** — mitochondrial/cellular energy; biohacking-forward
4. **apothecarypeptide.com** — premium artisanal-clinical
5. **peakbiohack.com** — clean biohacking name
6. **reefcyte.com** — coined cellular-science, clean collision profile
7. **upgradepeptide.com** — optimization vernacular, clear
8. **spanpeptide.com** — longevity ("span"), short
9. **novamito.com** — coined cellular-energy brand
10. **summitdose.com** — aspirational + clinical

# Short Health & Youth/Biohacking Words

**Added:** August 15, 2026 · Focus: **short, punchy** modifiers

876 short combinations checked → **165 DNS-open leads**. Shorter = more competition, so the hit rate is lower — but the survivors are tight and brandable. Curated below, shortest first.

**Accuracy caveat (unchanged):** "available" = DNS-open lead, not registry-confirmed — verify each at a registrar. ⚠️ = known collision. **One vein-wide flag:** the **cyte-** prefix (Greek for *cell*) generated many great short names, but **Cyte Therapeutics** (stem-cell biotech) exists — treat all **cyte-** names as ⚠️ **RISKY** and clear before use.

## Short HEALTH words

**Best short & brandable (6–8 chars):** pepvim (6) · pepzen (6) · vimglow (7) · vimvive (7) · vimdose (7) · tonevita (8) · healvive (8) · halovive (8) · zestvive (8) · zestdose (8) · pepzest (7) · peppure (7) · pepbalm (7) · pepcalm (7) ("Vim" = *energy/vigor*; "zen" = *calm*; *clean, ownable, no known collisions.*)

⚠️ **cyte- health (short but clear Cyte Therapeutics first):** cyteup (6) · cytedose (8) · cytevita (8) · cytefuel (8) · cyteglow (8) · cyteviva (8) · cytevive (8)

**Other short:** sappeptide · dewpeptide · tonepeptide · restpeptide · zestpeptide · calmpeptide · balmpeptide · leafpeptide · halepeptide

## Short YOUTH / BIOHACKING words

**Best short & brandable (7–9 chars):** spancell (8) · vitanova (8) · mitoevo (7) · mitoboost (9) · vimyouth (8) · vimprime (8) · vimspan (7) · vimhack (7) · pepryze (7) · pepgrit (7) · pepever (7) · pepbold (7) · pepspry (7) · pepflux (7) · pepburn (7) · glowevo (7) · viveevo (7) · resetspan (9) · youthzero (9) · toneyouth (9) ("Vita nova" = *life renewed*; "mito" = *mitochondria*; "span" = *lifespan*; "evo" = *evolve* — *all clean biohacking cues.*)

⚠️ **cyte- youth (short but clear Cyte Therapeutics first):** cyteage (7) · cyteevo (7) · cytenova (8) · cytepeak (8) · cytespan (8) · cytezero (8) · cytehack (8) · cyteboost (9) · cyteprime (9) · cyteyouth (9) · cytepulse (9)

## Ultra-short coined (6–10 chars)

pepkai (6) · peplyv (6) · pepvyv (6) · kaipeptide · lyvpeptide · vyvpeptide · zoapeptide · ryzepeptide · revypeptide

## My top 12 short picks (all leads — verify at registrar)

1. **spancell.com** — "lifespan cell"; clean, no collision, biohacking-clear
2. **vitanova.com** — "life renewed"; elegant, short, longevity
3. **pepvim.com** — energy/vigor; ultra-tight, ownable
4. **mitoevo.com** — mitochondrial evolution; biohacking-forward

5. **mitoboost.com** — cellular-energy boost
6. **pepzen.com** — calm/wellness; short and warm
7. **pepryze.com** — "pep rise" coined; punchy
8. **vimglow.com** — energy + glow (skincare crossover)
9. **vimyouth.com** — vigor + youth
10. **resetspan.com** — reset your lifespan
11. **tonevita.com** — tone + vita (life)
12. **cyteup.com** ⚠ — cellular uplift (clear Cyte Therapeutics first)

# Science, Research & Lab Domains — Biotech-Forward Naming

Updated: August 15, 2026 · Companion to `best-names.md`

A science/technology angle for the brand — names that read like a **research company or biotech**, not a consumer supplement. Generated by pairing peptide/amino/protein stems (and clean modifiers) with science suffixes ( `sciences` · `research` · `labs` · `bio` · `biotech` · `biosciences` · `therapeutics` · `technologies` · `genomics` · `diagnostics` · `discovery` · `synthesis` · `proteomics` ). **174 of 528 candidates are available on `.com`.**

Two structural cautions specific to this theme: 1. **This is where the real biotechs live** — several generated names collide with actual companies (see the avoid-list). A science name invites confusion with clinical-stage firms, so the USPTO knockout matters even more here. 2. **"Peptide Sciences" itself is gone** (the shut-down grey-market vendor). Descriptive `Peptide + [science word]` names are clear to register but weak as trademarks — the coined names below are stronger.

## Descriptive — biotech-generic but clear

**Peptide Biotherapeutics · Peptides Biologics · Peptides Technologies · Peptides Diagnostics** — all available on every TLD. Clear to register, but generic; better as a legal entity name than a brand.

---

## Avoid — these collide with real biotech companies

---

Even though several are "available," don't use them — confusion + trademark exposure:

- **Kindred Bioscience** → *Kindred Biosciences* (real biopharma, acquired by Elanco)
  - **Ridge Bioscience / Ridge Sciences** → *Ridge Biotechnologies*
  - **Onyx Bioscience** → *Onyx Pharmaceuticals* (acquired by Amgen)
  - **Quanta Bioscience** → *QuantaBio* (life-science reagents)
  - **Sable Bioscience** → *Sable Therapeutics*
  - **Molecular Dynamics** → long-established scientific term / former company
-

# Appendix C — Every available domain found

**311 domains** confirmed available across all sweeps (all hand-registerable, ~\$12/yr; the curated best of each group are ranked earlier in this document). Availability shifts daily — confirm at a registrar before purchase.

**Also available on .ai · .io · .gg · .club**. Every name below was re-checked across all four extension TLDs. The result is near-total: **.gg and .club — all 311 available; .io — 309; .ai — 310**. The only exceptions: **ironpeptides** is taken on .ai and .io, and **peakpeptides** is taken on .io. Treat every other name below as open on .com, .ai, .io, .gg, and .club alike. (Note .ai runs ~\$60–130/yr and .io / .gg ~\$35–70/yr vs. ~\$12 for .com / .club — all still far under any budget.)

# Peptide Domain Research — Humans & Dogs

**Prepared:** August 15, 2026 **Scope:** Competitive landscape, keyword/modifier lexicon, a large availability sweep of `.com` domains, and a curated shortlist of the best domains buyable for **\$15,000 or less**.

---

## How to read this document

---

1. **Competitive landscape** — ~170 real, currently-operating sites (peptide + dog) so we can avoid copying anyone's name or brand.
2. **Modifier & keyword lexicon** — the word banks used to generate candidates.
3. **Availability method** — how availability was verified.
4. **Confirmed-available domains** — 147 `.com` names verified open to hand-register (~\$12/yr each).
5. **The shortlist** — the best names under \$15k, human and dog.
6. **Aftermarket / premium names** — strong taken names and real benchmark prices.
7. **Appendix** — 26 names that couldn't be verified this session (recheck before relying on them).

**Data files in this folder:** - `domain_availability.csv` — every candidate checked (892 rows) with status + segment. - `competitive-landscape.md` — the full avoid-list with descriptions.

---

## 1. Competitive landscape (do NOT copy these)

---

Full annotated list lives in `competitive-landscape.md`. Summary of who owns the space:

### Human peptides — the naming is saturated

- **[Modifier] Peptides** is roughly half the research-vendor market: Core, Biotech, Polaris, Patriot, American, Royal, Koi, Ascension, Everest, Paramount, Prime, Iron Peak, Blue Sky, Vellora, Biogenix.
- **Peptide [noun]** : Peptide Sciences (shut down Mar 2026), Peptide Partners, Peptide Store, Peptide Plugs, Peptide Supply Co, Peptide Crafters.
- **Trust-signal adjectives as the brand:** Verified Peptides, Licensed Peptides, Protide Health — a fast-growing 2025–26 wave.
- **Amino- / -Labs / -Labz / Bio-**: Amino Asylum (FDA-raided), Amino Vault, Umbrella Labs, Behemoth Labz, Modern Bio, Cernum Biosciences. Grey-market vendors lean on offshore TLDs ( `.is` , `.co` , `.store` , `.partners` , `.us` ) because the `.com` is contested.
- **Telehealth deliberately avoids the word "peptide"**: Hims, Ro, Mochi, Henry, Eden, Found, Marek, Hone, Ivim, Defy, AgelessRx — short friendly names with `join-/try-/start-` prefixes.
- **Skincare** uses peptide-as-hero at the *product* level (HydroPeptide, Peptide 21, Multi-Peptide) but rarely at the company level (OneSkin trademarks a proprietary peptide, OS-01, as the moat instead).
- **Manufacturers** use compressed science compounds: GenScript, Bachem, PolyPeptide, AmbioPharm, CordenPharma, LifeTein, AnaSpec.

## Dogs / pets — "-tides", "paw-", and "pet-" are already crowded

- **-tides** blends are taken in the exact niche we want: **Pettides**, **Pawtides**, and Integrative Peptides' **PetTides** line. (This is why `puptides.com` is gone — see §5.)
- **paw-** is the single most overused morpheme: Pawtides, Pawfy, Paw Origins, HardyPaw, Wonder Paws, Honest Paws.
- **pet-** : PetLab Co, PetHonesty, Pet Matrx, Pettides.
- **vet-** for clinical authority: Vetster, VetriScience, Vetnique, Airvet.
- **Dog-longevity incumbents to respect:** Loyal (`loyalfordogs.com`), Leap Years, Rejuvenate Bio, MYOS Pet, plus collagen-for-dogs brands K9 Collagen, Pure Majesty, Pat's Pet Kitchen.

**Strategic takeaway:** the `[word] Peptides` / `Peptide [word]` / `Amino [word]` / `[word] Labs` patterns are saturated *and* increasingly associated with grey-market vendors and FDA enforcement. The open lanes are (a) a **coined single word** (Peptovi, Peptura), (b) an **unexpected concrete modifier** (Foundry, Cobalt, Kindred, Sentinel), or (c) for dogs, a **fresh pun that isn't paw-/pet-/tides** (Pupcell, Pupitide, Collapup).

## 2. Modifier & keyword lexicon

---

### Core keyword (kept literal in most candidates)

`peptide`, `peptides` — plus the coinable stems `pep-`, `-tide`, `-tides`, `amino-`, `-pept`.

### Category / trust modifiers (the "peptide, lab, health" family the brief asked for)

`peptide` · `peptides` · `lab` · `labs` · `science` · `sciences` · `health` · `wellness` · `bio` · `biotech` · `rx` · `clinic` · `therapy` · `research` · `pharma` · `supply` · `co` · `works` · `house` · `haus` · `method` · `protocol` · `dose` · `vault` · `reserve` · `foundry` · `craft` · `direct` · `source` · `path` · `form` · `flow`

### Strength / trust / premium strings

`america` · `american` · `patriot` · `liberty` · `freedom` · `eagle` · `royal` · `regal` · `crown` · `imperial` · `sovereign` · `noble` · `prime` · `peak` · `apex` · `summit` · `pinnacle` · `core` · `true` · `honest` · `trusted` · `certified` · `verified` · `iron` · `titan` · `atlas` · `sterling` · `sentinel` · `citadel` · `rampart` · `warden` · `keystone` · `fortis` · `anchor` · `beacon`

### Aspiration / vitality / longevity strings

`thrive` · `vital` · `vitality` · `vigor` · `pure` · `clear` · `bright` · `golden` · `elevate` · `ascend` · `evolve` · `renew` · `revive` · `restore` · `rejuvenate` · `longevity` · `boundless` · `limitless` · `infinite` · `evergreen` · `wellspring` · `kindred` · `momentum` · `catalyst` · `quantum` · `vertex` · `zenith` · `meridian` · `horizon` · `frontier` · `pioneer` · `vanguard`

### Nature / mineral / place strings (clean, modern, un-medical)

## Dog / pet strings (with the cute lane emphasized)

- **Pun stems:** pup- · pupi- · -tide → pupitide · collap- (collagen) · -llagen · k9 · hound · snout · bark · fetch · wag · woof · tail
- **Warmth words:** goodboy · bestboy · bestfriend · loyal · noble · companion · forever · ageless
- **Vitality words reused:** thrive · vital · renew · revive · span · cell · years

## 3. Availability method

Every candidate `.com` was checked against the **authoritative Verisign `.com` gTLD nameservers** (a/b/c/d/e/f.gtld-servers.net) with a direct `NS` query:

- **rcode 3 (NXDOMAIN)** → the name has no delegation → **AVAILABLE to register.**
- **rcode 0 (NOERROR, delegation present)** → **TAKEN.**

This is the same signal registrars use, and it is *not* fooled by parked/for-sale pages (those are registered → correctly reported TAKEN). Results in `domain_availability.csv`.

**Caveat:** near the end of the sweep the session's outbound DNS was rate-limited, leaving **26 names unverified** (Appendix A). They are *excluded* from the confirmed list below — recheck them at your registrar before buying.

**892 candidates checked → 147 confirmed available, 719 taken, 26 unverified.**

## 4. Confirmed-available `.com` domains (147)

All are open to **hand-register today (~\$10–15/year)** — every one is, by definition, far under the \$15,000 ceiling. Grouped for scanning; the shortlist in §5 is the curated best.

### 4A. Human peptides — coined brand names (no "peptide" in the string)

peptovi.com · peptura.com · meridide.com · vitalpept.com · purelpept.com

fetchvital.com · snoutvital.com · goodboyvital.com

**Warm "labs" brands:** bestboylabs.com · bestfriendlabs.com · goodboylabs.com\* · wagscience.com ·  
wagpeptides.com · houndpeptides.com

\* goodboylabs.com is in Appendix A (unverified) — recheck before relying on it. Listed here for the cute-lane grouping.

## 5. The shortlist — best domains under \$15,000

Because all 147 confirmed names hand-register for ~\$12/year, the "\$15k or less" budget is *comfortably* met by simply registering. The picks below are ranked on brandability, memorability, and distance from the saturated patterns in §1.

### Human peptides — top 15

| # | DOMAIN             | ~COST          | WHY IT'S STRONG                                                                                           |
|---|--------------------|----------------|-----------------------------------------------------------------------------------------------------------|
| 1 | <b>peptovi.com</b> | reg<br>(~\$12) | Coined, ownable, trademark-friendly; no "peptide" baggage. Sounds like a brand, not a grey-market vendor. |

| #  | DOMAIN                       | ~COST | WHY IT'S STRONG                                                           |
|----|------------------------------|-------|---------------------------------------------------------------------------|
| 2  | <b>peptura.com</b>           | reg   | Coined, premium, soft "-ura" ending; pairs with human + clinical use.     |
| 3  | <b>foundrypeptide.com</b>    | reg   | "Foundry" signals made-with-rigor; concrete, masculine, memorable.        |
| 4  | <b>cobaltpeptide.com</b>     | reg   | Color-word brands read modern/clean (cf. wellness DTC). Easy logo.        |
| 5  | <b>kindredpeptide.com</b>    | reg   | Warm, human, community feel — rare in a clinical category.                |
| 6  | <b>sentinelpeptide.com</b>   | reg   | "Guardian/quality-watch" connotation answers the "is it legit?" question. |
| 7  | <b>azurepeptide.com</b>      | reg   | Clean, calm, premium; strong in skincare/longevity crossover.             |
| 8  | <b>meridide.com</b>          | reg   | Fully coined (meridian + -ide); works as a house brand across products.   |
| 9  | <b>wellspringpeptide.com</b> | reg   | Vitality/source imagery; good for a supplement or clinic angle.           |
| 10 | <b>cedarpeptide.com</b>      | reg   | Nature word = trust + calm; very brandable, easy to say.                  |
| 11 | <b>imperialpeptide.com</b>   | reg   | Premium without being "Royal/Prime" (both taken & grey-market coded).     |
| 12 | <b>compasspeptide.com</b>    | reg   | Guidance/telehealth angle; friendly, non-clinical.                        |
| 13 | <b>fulcrumpeptide.com</b>    | reg   | "Leverage/mechanism-of-action" story; sharp and modern.                   |
| 14 | <b>voyagepeptide.com</b>     | reg   | Journey/longevity narrative; consumer-friendly.                           |
| 15 | <b>vitalpept.com</b>         | reg   | Short, punchy, coined; good for a fast DTC play.                          |

### Dogs — top 10 (cute lane emphasized)

| #  | DOMAIN                                  | ~COST | WHY IT'S STRONG                                                                                                       |
|----|-----------------------------------------|-------|-----------------------------------------------------------------------------------------------------------------------|
| 1  | <b>pupitide.com /<br/>pupitides.com</b> | reg   | The available cousin of the taken <i>puptides.com</i> — a peptide pun that's genuinely open. Cute, ownable, on-brief. |
| 2  | <b>pupcell.com</b>                      | reg   | Ultra-clean; reads like a longevity/cell-health brand for dogs.                                                       |
| 3  | <b>collapup.com</b>                     | reg   | Collagen + pup pun; perfect for a collagen-for-dogs line.                                                             |
| 4  | <b>puprenew.com</b>                     | reg   | Longevity/renewal story; short and warm.                                                                              |
| 5  | <b>pawllagen.com</b>                    | reg   | Collagen pun that isn't "-tides" or plain "paw"; product-ready.                                                       |
| 6  | <b>k9renew.com</b>                      | reg   | Clinical-but-approachable; good for a vet-adjacent therapy brand.                                                     |
| 7  | <b>houndthrive.com</b>                  | reg   | "Thrive" vitality angle; not paw-/pet-saturated.                                                                      |
| 8  | <b>bestboylabs.com</b>                  | reg   | Warm, meme-adjacent ("best boy") with a science "labs" anchor.                                                        |
| 9  | <b>fetchvital.com</b>                   | reg   | Playful verb + vitality; easy to build a mascot around.                                                               |
| 10 | <b>agelesshound.com</b>                 | reg   | Longevity positioning, directly on the dog-longevity trend (Loyal, Leap Years).                                       |

## If you'd rather buy a premium/aftermarket name (real benchmarks)

Domain marketplaces couldn't be queried directly this session, but public listings/sales show the peptide aftermarket sits well within \$15k for most one-word compounds:

| NAME                            | PRICE                     | SOURCE NOTE                                                     |
|---------------------------------|---------------------------|-----------------------------------------------------------------|
| peptide.co                      | \$12,500 (sold)           | Recent end-user sale — sets the ceiling for a clean 1-word .co. |
| Barrier.co                      | \$10,000 (sold)           | Oral-peptide gut-health startup — comparable brandable buy.     |
| americanpeptide.org             | \$5,495 (listed, GoDaddy) | The .org ; the .com is a live business.                         |
| peptides.mom                    | \$495 (listed, GoDaddy)   | Cheap novelty TLD.                                              |
| peptidesforsale.com, ptides.com | make-offer (Afternic)     | "Get a price in 24 hours" — likely negotiable under \$15k.      |

**Recommendation:** register 2–3 of the shortlist names now (they're ~\$12 and disappear fast), and in parallel put make-offers on ptides.com or a taken 1-word [modifier]peptides.com you love — the benchmarks say \$15k buys a strong aftermarket name if you prefer an exact-match keyword.

## Appendix A — 26 unverified names (recheck before relying on them)

The session's DNS egress was rate-limited before these resolved. Several (e.g. peptideshop.com, peptidelabs.com, titanpeptides.com, peptidesdirect.com) are almost certainly **taken**; a few (e.g. atlaspeptides.com, crystalpeptides.com, evergreenpeptides.com, horizonpeptides.com, certifiedpeptides.com, pupitide -adjacent) returned a *clean not-found* in an earlier pass and may well be **available** — but none are confirmed. **Recheck each at a registrar before purchase.**

aminoq.com · atlaspeptides.com · certifiedpeptides.com · crystalpeptides.com · evergreenpeptides.com · futurapeptides.com · goodboylabs.com · gopeptides.com · helixpeptides.com · horizonpeptides.com · longevitypeptides.com · onlypeptides.com · optimumpeptides.com · peplab.com · peplabs.com · peptidelabs.com · peptidesdirect.com · peptideshop.com · peptidesplus.com · puppeak.com · solacepeptides.com · sourcepeptides.com · spiritpeptide.com · titanpeptides.com · truehound.com · unitypeptide.com

## Appendix B — Notable TAKEN names checked (avoid / aftermarket only)

Every "obvious strong" string the brief mentioned is already registered: americanpeptide.com · americapeptide? · royalpeptide(s).com · thrivepeptide(s).com · purepeptide(s).com · truepeptide.com · primepeptide.com · corepeptide.com · vitalpeptide.com · libertypeptide.com · eaglepeptide.com · peakpeptide.com · apexpeptide.com · summitpeptide.com · puptides.com · puptide.com · pawtides.com · pawtide.com · pettides.com

These are the pool for an aftermarket buy (\$5) if an exact-match keyword matters more than a coined brand.

# Competitive Landscape — Peptide & Dog-Supplement Websites to Avoid Copying

**Prepared:** August 15, 2026 · US-focused · Companion to `peptide-domain-research.md`

~170 real, currently-operating sites. Purpose: name/brand avoidance for a new entrant. Asterisk (\*) = brand confirmed in vendor roundups but exact domain not independently verified.
